

4 Tier RX Plan

The 4 tier drug program will help you better control the high cost associated with prescription drug benefits. The plan offers access to a revolutionary 4 tier program to help you save money on all your prescription needs. Through our nationwide network of over 50,000 participating pharmacies you now have access to a 4 tier prescription plan.

Tier 01: < \$10

Consist of Generic Drugs that can be purchased for \$10.00 or less.

Tier 02: < \$20

Consist of Brand Name and Generic Drugs that can be purchased for \$20.00 or less.

Tier 03: < \$40

Consist of Brand Name and Select Generic Drugs that can be purchased for \$40.00 or less.

Tier 04: Special

Consist of Brand Name and Select Generic Drugs that can be purchased for a special discounted price.

PREFERRED DRUG LIST UPDATES: For the most up-to-date information about the Preferred Drug List, please see the information on our website. This Preferred Drug List includes most, but not all, therapeutic classes of prescription drugs and is subject to change at any time upon review. Our Preferred Drug List is reviewed each month. Physicians and Pharmacist are encouraged to review the Preferred Drug List and utilize it when prescribing for our members. This is extremely important since a member's prescription benefit is based on medication being prescribed for the Preferred Drug List. The Preferred Drug List is not intended to interfere with independent medical judgment that is based upon the patient-physician relationship. The final choice of specific drug selection for an individual patient rests solely with the prescriber.

GENERIC DRUG POLICY: It is our policy to utilize high quality generic medications when available. A generic drug is identical or bioequivalent, to a brand name drug in dosage form, safety, strength, route of administration, quality, performance characteristics, and intended use. Although generic drugs are chemically identical to their branded counterparts, they are typically sold at substantial discounts for the brand name price. It is our policy to encourage pharmacies to utilize the same generic product that was distributed by the same company that was dispensed on the original prescription on all subsequent refills for the drug product selection. We do not recommend that generic substituting be exercised with multisource products that cannot be considered therapeutically equivalent to others in the same category. It is also recommended that generic substitution not be undertaken for any unrated products that might be considered narrow therapeutic index (NTI) drugs or which are known not to be bioequivalent. Finally, it is important to note that state laws and regulations govern the practice of generic substituting for certain drug products. Requests for exception to the generic policy must clearly document specific reasons for medical necessity and appropriateness.

Medications that have generic equivalents available are covered at a generic reimbursement level and should be prescribed and dispensed in generic form. Maximum Allowable Cost (MAC) limits have been established for specific dosage forms of these drugs. The MAC list sets a ceiling price for the reimbursement of certain multisource prescription drugs. This price will typically cover the acquisition of most generic but not branded versions of the same drug. The products selected for inclusion on the MAC list are commonly prescribed and dispensed and have gone through FDA's review and approval process.

EXCLUSIONS & LIMITATIONS: Any medication or drug that has not been approved by the FDA to be both effective for use in the United States will not be covered. This includes both FDA approved and non-approved medications that are in experimental or investigational trials to determine new indications, new routes or administration, or new dosage forms. This Prescription Drug Card Is Not Insurance. Formulary is subject to change without notice. For the most up-to-date information about the Preferred Drug List, please see the information on our website.

4 Tier RX Plan
